DETAILED ACTION

Allowable Subject Matter

The indicated allowability of claims 136, 138-140, 153, and 155-157 is withdrawn.

Examiner has determined that restriction and election of species is proper.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 128-136 and 138-141, drawn to a microphone assembly with at least two microphones and signal processing circuitry wherein the microphones and circuitry limit amplitude and phase mismatches between the microphones, classified in class 381, subclass 358.
- II. Claims 145-153, 155-153 and 155-158, drawn to a microphone assembly with at least two microphones and signal processing circuitry wherein the circuitry limits amplitude and phase mismatches between the microphones, classified in class 381, subclass 92.
- III. Claims 162-168 and 172-174, drawn to a microphone assembly with at least two microphones and signal processing circuitry wherein the microphones limit amplitude and phase mismatches between themselves, classified in class 381, subclass 181.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In

Art Unit: 2644

the instant case the different inventions have different modes of operation due to the circuitry or microphone elements used to limit amplitude and phase mismatches in the microphone assembly output as a result of the at least two microphones.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention: Species I – Figure 3 noting the acoustical barrier, Species II – Figure 3 noting the sealing gasket, Species III – Figure 3 noting the protective screens, Species IV – Figure 3 noting the acoustical barrier and protective screens, Species V – Figure 3 noting the acoustical barrier and covering, Species VI – Figure 7, Species VII – Figure 4

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

Art Unit: 2644

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian T. Pendleton whose telephone number is (703) 305-9509. The examiner can normally be reached on M-F 7-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Forester W. Isen can be reached on (703) 305-4386. The fax phone
